# Candle care and safety guide

## JOURNEY WITH US ...

Celebrate our beautiful, fragrant world. We create aromatic candles that are pure, luxurious and wonderfully therapeutic.

You can rest assured that we use natural, renewable soy wax, cotton wicks and 100% pure essential oils which have been certified organic by the world's leading authorities. We donate 5% of our profits to The Bumblebee Conservation Trust too. **Thank you for choosing Nula Soy.**

**Please read this leaflet** and keep it for reference

When lighting the candle for the first time, allow the surface wax to melt all the way across to secure a 'wax memory' and prevent tunnelling.

Burn the candle for a maximum of 4 hours at a time (2 hours for Piccolo size).

Should the wick become bulbous, extinguish the flame, trim the wick and relight the candle.

Please wash your empty glass carefully by hand in order to protect the coloured coating.

Never leave a burning candle unattended

Always keep candles out of reach of children and pets

Do not burn candles on or near anything that can catch fire

Observe the minimum distance between burning candles

Ensure the wick is trimmed to 5mm before lighting the candle

Always keep candles well away from drafts

Ensure candles are kept away from heat sources

Do not attempt to move a candle whilst it is burning

Keep the melted wax free from contaminants

Never try to extinguish a candle with fluid
